

Information and Communication Technology (ICT) Capability Learning Continuum (ACARA)

Organising Elements		Stage e	Stage 1	Stage 2	Stage 3	Stage 4	Stage 5
		Typically by the end of Foundation Year, students:	Typically by the end of Year 2, students:	Typically by the end of Year 4, students:	Typically by the end of Year 6, students:	Typically by the end of Year 8, students:	Typically by the end of Year 10, students:
Applying social and ethical protocols and practices when using ICT	Recognise intellectual property	recognise ownership over their own digital work	recognise ownership of digital products that others produce and that what they create or provide can be used or misused by others	acknowledge when they use digital products created by someone else, and start to indicate the source	identify the legal obligations regarding the ownership and use of digital products and apply some referencing conventions	apply practices that comply with legal obligations regarding the ownership and use of digital products resources	identify and describe ethical dilemmas and consciously apply practices that protect intellectual property
	Apply digital information security practices	follow class rules about using digital information	follow class rules about applying selected standard guidelines and techniques to secure digital information	independently apply standard guidelines and techniques for particular digital systems to secure digital information	independently apply strategies for determining and protecting the security of digital information and assess the risks associated with online environments	independently apply strategies for determining the appropriate type of digital information suited to the location of storage and adequate security for online environments	use a range of strategies for securing and protecting information, assess the risks associated with online environments and establish appropriate security strategies and codes of conduct
	Apply personal security protocols	follow class rules when sharing personal information with known audiences and demonstrate an awareness of applying social protocols when using ICT to communicate	follow class guidelines when sharing personal information and apply basic social protocols when using ICT to communicate with known audiences	apply standard guidelines and take action to avoid the common dangers to personal security when using ICT and apply appropriate basic social protocols when using ICT to communicate with unknown audiences	identify the risks to identity, privacy and emotional safety for themselves when using ICT and apply generally accepted social protocols when sharing information in online environments, taking into account different social and cultural contexts	identify and value the rights to identity, privacy and emotional safety for themselves and others when using ICT and apply generally accepted social protocols when using ICT to collaborate with local and global communities	independently apply appropriate strategies to protect rights, identity, privacy and emotional safety of others when using ICT, and discriminate between protocols suitable for different communication tools when collaborating with local and global communities
	Identify the impacts of ICT in society	identify how they use ICT in multiple ways on multiple devices	identify how ICT is used at home and at school	identify the value and role of ICT use at home and school	explain the main uses of ICT at school, home and in the local community, and recognise its potential positive and negative impacts on their lives	explain the benefits and risks of the use of ICT for particular people in work and home environments	assess the impact of ICT in the workplace and in society, and speculate on its role in the future and how they can influence its use

Organising Elements		Stage e	Stage 1	Stage 2	Stage 3	Stage 4	Stage 5
		Typically by the end of Foundation Year, students:	Typically by the end of Year 2, students:	Typically by the end of Year 4, students:	Typically by the end of Year 6, students:	Typically by the end of Year 8, students:	Typically by the end of Year 10, students:
Investigating with ICT	Define and plan information searches	use ICT to identify where information is located	use ICT to identify, record and classify textual and graphic information to show what is known and what needs to be investigated	use ICT to plan an information search or generation of information, recognising some pattern within the information	use a range of ICT to identify and represent patterns in sets of information and to pose questions to guide searching for, or generating, further information	use a range of ICT to analyse information in terms of implicit patterns and structures as a basis to plan an information search or generation	select and use a range of ICT independently and collaboratively, analyse information to frame questions and plan search strategies or data generation
	Locate, generate and access data and information	use icons to locate or generate required information	locate information from a given set of digital sources	locate, retrieve or generate information from a range of digital sources	locate, retrieve or generate information using search engines and simple search functions and classify information in meaningful ways	locate, retrieve or generate information using search facilities and organise information in meaningful ways	use advanced search tools and techniques or simulations and digital models to locate or generate precise data and information that supports the development of new understandings
	Select and evaluate data and information	explain how located data or information was used	explain the usefulness of located data or information	explain why located data or information was selected	assess the suitability of data or information using a range of appropriate given criteria	assess the suitability of data or information using appropriate own criteria	develop and use criteria systematically to evaluate the quality, suitability and credibility of located data or information and sources
Creating with ICT	Generate ideas, plans and processes	use ICT to follow or contribute to a simple plan for a solution	use ICT to prepare simple plans to find solutions or answers to questions	use ICT to generate ideas and plan solutions	use ICT effectively to record ideas, represent thinking and plan solutions	use appropriate ICT to collaboratively generate ideas and develop plans	select and use ICT to articulate ideas and concepts, and plan the development of complex solutions
	Generate solutions to challenges and learning area tasks	use ICT as a creative tool to generate simple solutions, modifications or data representations for personal or school purposes	experiment with ICT as a creative tool to generate simple solutions, modifications or data representations for particular audiences or purposes	create and modify simple digital solutions, creative outputs or data representation/transformation for particular purposes	independently or collaboratively create and modify digital solutions, creative outputs or data representation/transformation for particular audiences and purposes	design and modify simple digital solutions, or multimodal creative outputs or data transformations for particular audiences and purposes following recognised conventions	Design, modify and manage complex digital solutions, or multimodal creative outputs or data transformations for a range of audiences and purposes

Organising Elements		Stage e	Stage 1	Stage 2	Stage 3	Stage 4	Stage 5
		Typically by the end of Foundation Year, students:	Typically by the end of Year 2, students:	Typically by the end of Year 4, students:	Typically by the end of Year 6, students:	Typically by the end of Year 8, students:	Typically by the end of Year 10, students:
Communicating with ICT	Collaborate, share and exchange	use purposefully selected ICT tools safely to view information shared by trusted adults	use purposefully selected ICT tools safely to share and exchange information with appropriate local audiences	use appropriate ICT tools safely to share and exchange information with appropriate known audiences	select and use appropriate ICT tools safely to share and exchange information and to safely collaborate with others	select and use appropriate ICT tools safely to lead groups in sharing and exchanging information, and taking part in online projects or active collaborations with appropriate global audiences	select and use a range of ICT tools efficiently and safely to share and exchange information, and to collaboratively and purposefully construct knowledge
	Understand computer mediated communications	understand that messages are recorded, viewed or sent in computer mediated communications for others to receive	understand that computer mediated communications may be received later by the receiver	understand that computer mediated communications are directed to an audience for a purpose	understand that particular forms of computer mediated communications and tools are suited to synchronous or asynchronous and one-to-one or group communications	understand that there are various methods of collaboration through computer mediated communications that vary in form and control	understand that computer mediated communications have advantages and disadvantages in supporting active participation in a community of practice and the management of collaboration on digital materials
Managing and operating ICT	Select and use hardware and software	identify and safely operate ICT systems to complete relevant simple specified tasks and seek help when encountering a problem	identify and safely operate a selected range of appropriate devices, software, functions and commands when operating an ICT system and attempt to solve a problem before seeking help	identify and independently operate a range of devices, software, functions and commands, taking into consideration ergonomics when operating appropriate ICT systems, and seek solutions when encountering a problem	select from, and safely operate, a range of devices to undertake specific tasks and use basic troubleshooting procedures to solve routine malfunctions	independently select and operate a range of devices by adjusting relevant software functions to suit specific tasks, and independently use common troubleshooting procedures to solve routine malfunctions	justify the selection of, and optimise the operation of, a selected range of devices and software functions to complete specific tasks, for different purposes and in different social contexts
	Understand ICT systems	identify common consumer ICT systems with input and output functions	identify the main components of common consumer ICT systems, their fundamental functions, and describe them using basic ICT terminology	identify and compare the use of the main components of different ICT systems	identify, compare and classify basic ICT system components	identify and compare networked ICT system components including between hardware, software and data	apply an understanding of networked ICT system components to make changes to functions, processes, procedures and devices to fit the purpose of the solutions
	Manage digital data	save and retrieve digital data with support	manage and maintain digital data with guidance	manage and maintain digital data using common methods	manage and maintain data on different storage mediums – locally and on networks	manage and maintain data for groups of users using a variety of methods and systems	manage and maintain data securely in a variety of storage mediums and formats
